c**T**c Transport Planning

c**T**c Infrastructure

Transport Planning, Traffic Engineering, Highway and Infrastructure
Design consultancy for property developers and asset managers.

www.tonks-consulting.co.uk

Transport planning, traffic engineering, highways and infrastructure design consultancy with commercial understanding; that's the **cTc** way.

We help you to maximise return from your property and land investments.

cTc provide comprehensive transport planning, highways and infrastructure design services which are driven by a detailed understanding of our Clients' commercial targets and business drivers. We can support your planning applications and inform your asset management to ensure that your property aspirations are achievable and continue to operate efficiently and profitably.

We liaise with highway authorities to ensure positive consultation responses to your commercial planning applications and to control impact on your sites' accessibility due to external highway works and congestion. We liaise with statutory service providers and statutory consultees in regard to flood risk assessment and drainage design.

-
